Team members will now be using app “Genius” for documentation for training and other pertinent certificates. Directions on downloading and using app handed out at the business meeting and can also be found on JP website.

Dennyse Loll states she gets training records from ASARCA instructors. Only wants the drivers license expiration dates in VR, not the number. Also wants to make sure all drivers have auto insurance.

Do not forget to add training completion dates in VR. Then use “Genius” app to provide documentation.
