

## CalTopo Call Out Checklist

- Make sure you have at least 1 base layer (MapBuilder Topo at minimum) downloaded for off-line use to your device in case you lose cellular coverage. Recommend all 4 of these; MapBuilder Topo, Forest Service 2016, Motor Vehicle MVUM and Cell Coverage.
- When you receive a call out notification that has a CalTopo link for the mission map, make sure you click the link and load the map on each device you will be using on the mission and **Check in on VR, BEFORE YOU LEAVE YOUR RESIDENCE.**
- When you open the CalTopo app on your device, **ALWAYS** check that you are on the correct map (shown on upper left corner of map.) If you are not on the correct map open the 3-line menu icon on the upper left corner of the display, close the map then select the correct map from the Jeep Posse Maps folder.
- Make sure you have the mission map open on your device before proceeding. Start recording your tracks shortly (couple of miles) after you leave your residence. (4 Dot menu on lower right corner of map, Record Track, Change the track name to your first initial last name today's date i.e. **J Smith 6/17/23**, Select record track.)
- ***When you leave the IC for home, stop your Record Track, and start the Share Location option with Jeep Posse*** (4 Dot menu / Share Location/ Just your name in Display Name / Tap Share with Jeep Posse / tap Start Sharing) ***When you sign out of VR at your home also stop Share Location.***
